

Favelle Favco scales and streamlines end-to-end processes with Dynamics AX

Favelle Favco Berhad is a manufacturer of construction cranes under the brands Favelle Favco and Kroll. The group is a home to the largest crane manufactured in the world. The company's main plant is based at Senawang, Malaysia, with offices in Sydney, China, Texas and Denmark.

Industry: Construction Machineries
Size: 1000-1500 Employees

Location: Kuala Lumpur, Malaysia

The unsynchronized data between Engineering and Operations resulted in more time for data inputs, human errors, data redundancy, and collaboration complications. This forced Favco to integrate AutoCAD and Dynamics AX to accelerate the design to manufacturing process.

- Dynamics AX 2012
- Dynamics AX & AUTOCAD integrations

Integration of Dynamics AX with AutoCAD made it possible for Favco to reduce the time and efforts into providing user inputs. Automatic exchange data of Items, Properties, and BOMs, between CAD and Dynamics AX enhanced user productivity and efficiency in carrying out everyday tasks. Enhancements in the system helped them scale their business and streamline end-to-end processes.
